Accordingly, the use of borrowings by the Company may increase the volatility of the Net Asset Value of the Ordinary Shares, and the price of the Ordinary Shares.

The Company has the flexibility to enable it to take out long-term borrowings in appropriate circumstances. Any long-term borrowings and any borrowings in excess of 10% of net assets require the separate authorisation of the Board.  The AIFMD prescribes two methods of measuring and expressing leverage and requires disclosure of the maximum amount of leverage the Company might be subject to. The definition of leverage is wider than that of gearing and includes exposures that are not considered to contribute to gearing. The Company has set the following leverage limit:  130 per cent. on both a gross and commitment basis.

(g)	(7) a description of the AIF's valuation procedure and of the pricing methodology for valuing assets, including the methods used in valuing any hard-to-value assets, in line with FUND 3.9 (Valuation);	<p>The Company's business is investing in financial assets, primarily global equities, with a view to profiting from their total return in the form of income and capital growth. This portfolio of financial assets is managed and its performance evaluated on a fair value basis, in accordance with a documented investment strategy.</p> <p>The AIFM is ultimately responsible for the valuation of assets. The Administrator is responsible for the day-to-day preparation of the daily NAV including all security valuations and it is the AIFM's responsibility to validate this NAV. For hard-to-value assets, the Board must appoint a competent party to value the security, namely the AIFM Valuation Committee. The AIFM then instructs the Administrator as to what price the security should be held at. The valuation function is performed independently from the portfolio management function. Upon initial recognition, investments are held at fair value through the profit and loss. Fair value is the listed market value of the relevant exchange. Subsequently the investments are valued at fair value, which are closing bid prices for listed investments quoted on the relevant investment exchange.</p> <p>For hard-to-value investments which are not traded in active markets, unlisted and restricted investments, the AIFM has its own valuation policy, in line with IPEV and EVCA guidelines.</p>

This requires the AIFM to identify and monitor its investment in asset classes which are considered to be relatively illiquid. The investment strategy is intended to ensure that that there are a sufficient number of investments that are readily realisable and can be sold to meet any funding requirements.</p> <p>The liquidity policy is reviewed and updated, as required, on at least an annual basis.</p> <p>Shareholders do not have a right for their Ordinary Shares to be redeemed and the Company does not have a fixed winding-up date.</p>
